

Environmental, Occup. Health and Safety Services

TOP-Consultants offer clients a complete range of environmental, safety and health consultancy services, through its highly qualified consultants with a deep specialisation in environmental, occupational health and safety management.

Companies will often face complex administrative demands while carrying out environmental, occupational health and safety operations. TOP-Consultants assists companies in managing the impact of environmental, safety and health affairs on their valuation and continuity. Strategic improvements involving environmental, safety and health issues are critical to a successful business.

We support businesses involved in corporate transactions, bringing a commercial approach to identifying and assessing social and environmental liability issues. In the post-transaction period, we can help to develop plans to mitigate environmental liability and to integrate disparate health, safety, and environmental management systems. Our consultants, with national and international experience, are all multi-disciplinary professionals, with technical, legal and financial backgrounds.

Method of work

TOP has developed their own special way of working, which is based on the following criteria:

1. Working together with our clients to achieve the best results.
2. Custom tailored services.
3. Ensuring that only those activities that are necessary are undertaken.

TOP is specialised in their approach to problem solving, whilst simultaneously providing pragmatic and cost effective solutions.
